Order no.: 41979

Article number: 41979

EAN: 4010995419790

Customs tariff number: 82041100

Simplifies your work: The ball end facilitates access to screws and allows you to work at an angle of up to 25°.

Increases your efficiency: The colored L-keys are quick and easy to find. Thanks to their luminescent paint, they can even be retrieved in the dark with the Wiha flashlight with UV light function. This means it takes less time to find lost L-keys, while the risk of machine damage due to tools left inside machines is minimized. The hexagonal ball end of the L-keys enables users to fasten and unfasten effortlessly at an angle of up to 25°.

Increases your efficiency: Wiha MagicRing® holding feature holds all hex screws in place without a magnet.

Increases your efficiency: The required key width can be quickly found thanks to colour coding.

Lowers your costs: Reduces the risk of forgetting and leaving keys inside a machine and causing damage.

Makes handling easier: Always the correct key when you need it.

Product dimensions: 231 x 73 x 35 mm (LxWxD)

Application: Ideal for tightening or loosening all hex screws in hard-to-reach places, removing standard countersunk screws and inserting and screwing into horizontal, inclined or deep tapped blind holes.

Supplementary information: MagicRing® from size 3 mm.

Quick removal: turn the L-key and pull it out

Easy to find with UV light

Perfect for confined spaces thanks to ball end

Nonmagnetic holding feature

It's a common experience. It is not easy to remove individual keys from many L-key holders or place them back in the holder again. With Wiha ErgoStar, you can now say goodbye to such problems as it eliminates the bother in an ingenious way. Turning one L-key in the holder makes all the other keys turn to the side at the same angle, allowing you to remove the key you need quickly and comfortably. A clamping mechanism in the holder makes sure that the keys cannot fall out, regardless of whether the holder is open or closed. The colored L-keys are also quick and easy to find and, thanks to the luminous paint, even in the dark using UV light. This means it takes less time to find lost L-keys and minimizes the risk of leaving tools inside machines when working on equipment. Thanks to the MagicRing® holding feature (from size 3) with its spring steel ring, the L-keys hold all standard hex screws firmly in any position perfectly without any magnets. The hexagonal ball end allows effortless screwing at an angle of up to 25°. The L-key set contains nine colored hex L-keys in standard sizes and can be hung up directly at the workplace using the suspension bracket on the holder.

Based on ISO 2936L.

Content:

- 1x L-keys hexagonal ball in fluorescent colour 1.5 mm x 91 mm (41894)
- 1x L-keys hexagonal ball in fluorescent colour 2.0 mm x 101 mm (41895)
